Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 May 2008.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

With respect to applicants amendment that declares there being two monitors, one for the patient and the other for the specialist. The examiner argues that dual monitors could be utilized by Moore to create a better display system.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moore, US Patent Pub. 2003/0099370 A1, and further in view of Stott et al, US Patent 7,288,072 B2.

Re Claim 1, Moore discloses a method for matching hearing aids to the individual requirements of a patient with impaired hearing in realistic situations, comprising the

steps of: passing sound example and scene which corresponds to said sound example visually to said patient at the same time (Moore, abstract), in order that a visual impression can be used for assessment of the acoustic experience by said specialist for matching a hearing aid to a patient's individual requirements (Moore, abstract), but fails to disclose providing two monitors, one for a specialist and one for said patient, a computer and at least one speaker where said computer supplies said two monitors with a video sequence and said speaker with a sound example. However, Stott et al discloses using a computer system by a patient to adjust his/her hearing aid with minimal assistance from an audiologist (Stott et al, abstract).

Taking the combined teachings of Moore and Stott et al as a whole, one skilled in the art would have found it obvious to modify the method for matching hearing aids to the individual requirements of a patient with impaired hearing in realistic situations, comprising the steps of: passing sound example and scene which corresponds to said sound example visually to said patient at the same time (Moore, abstract), in order that a visual impression can be used for assessment of the acoustic experience by said specialist for matching a hearing aid to a patient's individual requirements (Moore, abstract) of Moore with a computer by a patient to adjust his/her hearing aid with minimal assistance from an audiologist as taught in Stott et al (Stott et al, abstract) to create better patient specialist interaction.

The combined teachings of Moore and Stott fail to disclose a second monitor for the specialist. Official notice is taken that both the concepts and advantages of providing dual monitors within a computer system are well known in the art. Thus is it

would have been obvious to use a dual monitor set-up within an enclosed space to enable better interaction between multiple users.

Claim 2 has been analyzed and rejected according to claim 1.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
